OUR RECOMMENDATIONS FOR SECURING TOOLS WHEN WORKING AT HEIGHT

Always attach tools to a belt with a Lanyard.
NEVER work with tools unattached when working at height

1 RECOMMENDED PRODUCTS

Connell Ballistic Nylon Padded Belt with 8 Rings for Safety Lanyards (C-NSB-LB2-R)

Metal rings for Lanyard attachment

Acesa Safety Lanyard (A4390-0000)

IMN Safety Lanyard Including 7/16 Scaffold Spanner (SF-IMN1258B)

All products sold separately. See our website www.buybrandtools.com for the full range of tools, accessories and complete belt sets

2

Always check Tool belts and Lanyards on a daily basis and before use

Be aware that the Tool belt can become the weakest point if the buckles and rivets are not regularly checked

How To Check Tool Belts

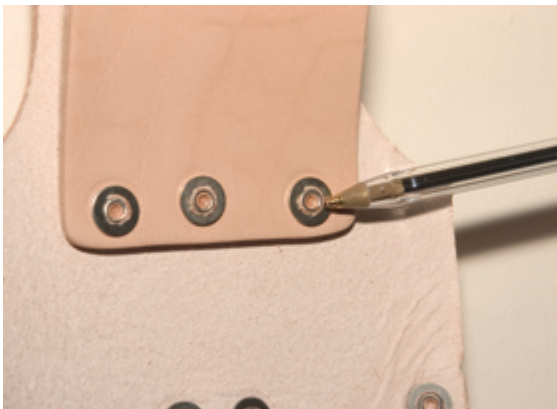

- Check the buckle

- Check stitching and belt slider

- Check for any cuts or nicks - even the slightest cut can seriously affect performance

Check Tool Pouches Separately

- Check rivets and washers thoroughly

- Twist leather and pressurize rivets to check for faults
